DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, 16-33, drawn to a system for providing telephonic communication, classified in class 370, subclass 352.
 - II. Claims 34-38, drawn to an interface for providing telephonic communication, classified in class 370, subclass 463.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I and II have separate utility such as the followings: Inventions and II are related as subcombinations disclosed as usable together in a single combination of telephonic communication between a calling party and another party; Invention I has separate utility of “analyzing the audio information as a function of Internet protocol connectivity status of the telephonic communication addressee to establish internet telephonic communications”; Invention II has separate utility of “analyze the telephonic communication address to establish internet telephonic communications”. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
